Features, Benefits & Procedures

Before using Ash Grove® Kolorstone® tape or stencils make sure surface is clean and free from all foreign materials.

When taping out patterns make sure the pattern is straight, parallel and perpendicular. When designing your Kolorstone® project make sure to plan the pattern so it fits the desired area. When the pattern is taped or stencil is down, look at it closely to see if the lines or patterns are consistent with your design.

The Kolorstone® stencils need to be correctly overlapped when laying out. Do not re-use stencils after Kolorstone® has been sprayed on it. When taping make sure to leave extra tape at the ends so you will have something to hold on to when you remove the tape.

Pulling stencils or tape soon after spraying Kolorstone® may not leave a distinct edge. Waiting longer to pull the stencil or tape will leave a crisper edge. The stencils or tape can generally be pulled when you can safely walk on the Kolorstone®.

All Kolorstone® stencils are special order; allow time for delivery.
